Re: AAS 165-14887-00016
Transfer of Existing Source Specific
Operating Agreement from Martin Marietta
Materials, Inc.,
to Roskovensky Concrete and Gravel
SSOA S 165-7123-00016

Dear Mr. Roskovensky:

On September 5, 2001, the Office of Air Quality (OAQ) received a request from Martin Marietta Aggregates, to transfer ownership and change the name from Martin Marietta Materials, Inc. - Clinton Sand Plant, located at 3200 E 1850 S, Clinton, Indiana to Roskovensky Concrete and Gravel, at the same location.

A)	<u>Identification</u>	<u>S 165-7123-00016</u>
	<u>Type</u>	<u>Source Specific Operating Agreement</u>
	<u>Date Issued</u>	<u>November 27, 1996</u>

This administrative amendment acknowledges the transfer of the above mentioned approval from Martin Marietta Materials, Inc. - Clinton Sand Plant, to Roskovensky Concrete and Gravel. All conditions and limitations of this approval shall remain unchanged and in effect. Please find a copy of the SSOA with the revisions.

If you have any questions regarding this transfer, please contact Janet Mobley at 317/232-8369 or at 1-800-451-6027, press 0 and ask for extension 2-8369.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Quality

Re: 165-14887-00016
Administrative Amendment to
Source Specific Operation Status
S 165-7123-00016

Dear Mr. Roskovensky:

The application for the sand and gravel plant received on November 8, 1996, has been reviewed. Based on the data submitted and the provisions in Section 1 of 326 IAC 2-1, it has been determined that said sand and gravel plant, to be located at 3200 E 1850 S, Clinton, Indiana 47842, has met the criteria required to obtain a Source Specific Operating Agreement.

Pursuant to IC 4-21.5-3-5(a) and (b), approval of this Source Specific Operating Agreement shall not be effective until fifteen (15) days from the date of this letter.

The facilities and processes of this source are hereby granted the Source Specific Operating Agreement provided that the following requirements of 326 IAC 2-9 are satisfied:

1. The source annual throughput shall not exceed one million (1,000,000) tons per year.
2. That records of the annual throughput, based on a calendar year, shall be prepared and maintained. These records shall be maintained for a minimum period of five (5) years, and made available upon request of the Office of Air Quality (OAQ).
3. That wet process or continuous wet suppression shall be used.
4. All equipment that generate particulate matter (PM) emissions and any associated control devices shall be operated and maintained at all times of plant operation, in such a manner, as to meet all of the requirements of this Source Specific Operating Agreement.

5. The visible emissions from the screening and conveying operation shall not exceed an average of ten percent (10%) opacity in twenty-four (24) consecutive readings in a six (6) minute period. Compliance with this limitation shall be determined by 40 CFR 60, Appendix A, Method 9.
6. The visible emissions from the crushing operation shall not exceed an average of fifteen percent (15%) opacity in twenty-four (24) consecutive readings in a six (6) minute period. Compliance with this limitation shall be determined by 40 CFR 60, Appendix A, Method 9.
7. The fugitive particulate matter (PM) emissions of this source shall be controlled by applying water on all storage piles and unpaved roadways on an as needed basis, such that the following visible emission conditions are met:
 - (a) The visible emissions from any storage pile shall not exceed twenty percent (20%) in twenty-four (24) consecutive readings in a six (6) minute period. This limitation shall not apply during periods when application of control measures are ineffective or unreasonable due to sustained high wind speeds. The opacity shall be determined using 40 CFR 60, Appendix A, Method 9, except that the opacity shall be observed at approximately four (4) feet from the surface at the point of maximum opacity. The observer shall stand at least fifteen (15) feet, but no more than one-fourth (1/4) mile, from the plume and at approximately right angles to the plume.
 - (b) The visible emissions from unpaved roadways shall not exceed an average instantaneous opacity of twenty percent (20%). Average instantaneous opacity shall be the average of twelve (12) instantaneous opacity readings, taken for four (4) vehicle passes, consisting of three (3) opacity readings for each vehicle pass. The three (3) opacity readings for each vehicle pass shall be taken as follows:
 - (i) The first reading shall be taken at the time of emission generation.
 - (ii) The second reading shall be taken five (5) seconds after the first.
 - (iii) The third reading shall be taken five (5) seconds after the second reading, or ten (10) seconds after the first reading.

The three (3) readings shall be taken approximately four (4) feet from the surface at the point of maximum opacity. The observer shall stand at least fifteen (15) feet, but no more than one-fourth (1/4) mile, from the plume and at approximately right angles to the

plume.

8. The source shall provide an annual notice to the commissioner, stating that the source is in operation, and certifying that its operations are in compliance with the requirements of this Source Specific Operating Agreement. The above annual notice shall be submitted to:

**Compliance Data Section
Office of Air Quality
100 North Senate Avenue
P.O. Box 6015
Indianapolis, IN 46206-6015**

no later than January 30 of each year, with the annual notice being submitted in the format attached.

9. Any exceedance of any requirement contained in this operating agreement shall be reported, in writing, within one (1) week of its occurrence.

The owner or operator is hereby notified that this operating agreement does not relieve the permittee of the responsibility to comply with the provisions of any applicable New Source Performance Standards (NSPS), 40 CFR Part 60, or National Emission Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Part 61.

Any change or modification which will alter operations in such a way that it will no longer comply with the applicable restrictions and conditions of this operating agreement, must obtain the appropriate approval from the Office of Air Quality (OAQ) under 326 IAC 2-5.1, 326 IAC 2-5.5, 326 IAC 2-6.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, and 326 IAC 2-8, before such change may occur.

Sincerely,

Paul Dubenetzky, Chief
